

Deliverable 6 – Dashboard Wireframes

Healthcare Patient Experience Analytics using Power BI

Introduction

The dashboard solution consists of six interactive reports designed to support different levels of healthcare decision-making. Each dashboard focuses on a specific business objective and presents key performance indicators (KPIs), visualizations, and interactive features to help stakeholders analyze patient satisfaction, compare healthcare performance, and identify opportunities for improvement.

The dashboard layouts were designed using Business Intelligence best practices, including consistent color themes, clear visual hierarchy, intuitive navigation, and interactive filtering capabilities.

Report 1 – Executive Overview Dashboard

Purpose

Provides senior executives with a high-level overview of national healthcare performance and patient satisfaction.

Target Audience

- Chief Executive Officer (CEO)
- Executive Committee
- Chief Quality Officer

KPIs

- Overall Satisfaction
- National Top-box %
- National Middle-box %
- National Bottom-box %
- Number of Participating States

- Number of Quality Measures

Visualizations

Visualization	Business Purpose
KPI Cards	Display key healthcare performance metrics
Line Chart	Monitor patient satisfaction trends
Treemap	Compare quality measure performance
Matrix	Analyze measure-wise performance
Filled Map	Display state-wise patient satisfaction

Report 2 – State Performance Dashboard

Purpose

Analyze patient satisfaction and healthcare performance across individual states.

Target Audience

- State Health Administrators
- Regional Managers

KPIs

- Selected State
- Selected Region
- State Satisfaction Score
- State Ranking
- Highest Performing Measure
- Lowest Performing Measure

Visualizations

Visualization	Business Purpose
KPI Cards	Display state performance metrics
Line Chart	Analyze state performance trends
Clustered Bar Chart	Compare measures within a state
Matrix	Detailed measure analysis
Scatter Chart	Compare state performance across measures

Report 3 – Patient Experience Measures Dashboard

Purpose

Evaluate patient satisfaction across healthcare quality measures.

Target Audience

- Chief Quality Officer
- Healthcare Analytics Team

KPIs

- Number of Quality Measures
- Highest Performing Measure
- Lowest Performing Measure
- National Top-box %
- National Middle-box %
- National Bottom-box %

Visualizations

Visualization	Business Purpose
KPI Cards	Display measure-level KPIs
Line Chart	Measure performance over time
Treemap	Compare quality measures
Clustered Column Chart	Measure-wise comparison
Ribbon Chart	Rank healthcare measures

Report 4 – National vs State Benchmark Dashboard

Purpose

Compare state healthcare performance against national benchmarks.

Target Audience

- Hospital Accreditation Team
- Healthcare Executives

KPIs

- National Top-box %
- State Average Top-box %
- Variance
- Performance Status

Visualizations

Visualization	Business Purpose
Line Chart	Compare national and state trends
Clustered Bar Chart	Variance analysis
Combo Chart	Benchmark comparison
Waterfall Chart	Gap analysis

Report 5 – Regional Performance Dashboard

Purpose

Compare patient satisfaction across different U.S. regions.

Target Audience

- Regional Managers
- Policy Makers

KPIs

- Region Ranking
- Regional Satisfaction Score
- Survey Response Rate
- Number of Participating States
- Highest Performing Measure
- Lowest Performing Measure

Visualizations

Visualization	Business Purpose
Line Chart	Regional satisfaction trends
Clustered Bar Chart	Regional performance comparison
Top 10 States Chart	Identify highest-performing states
Bottom 10 States Chart	Identify improvement opportunities

Report 6 – Trend Analysis Dashboard

Purpose

Monitor patient satisfaction trends over different reporting periods.

Target Audience

- Policy Makers
- Healthcare Leadership

KPIs

- Overall Satisfaction
- Survey Response Rate
- Year-over-Year Satisfaction Change
- Number of Participating States
- Highest Performing Measure
- Lowest Performing Measure

Visualizations

Visualization	Business Purpose
Line Chart	Overall satisfaction trend
Clustered Column Chart	Reporting period comparison
Line Chart	Measure performance trends
Area Chart	Response rate trends
Waterfall Chart	Improvement analysis

Dashboard Design Standards

The dashboards were designed using the following standards:

- Consistent healthcare-themed color palette.
- Clear visual hierarchy for executive reporting.
- Interactive slicers for filtering by state, region, reporting period, and measure.
- Business-friendly KPI cards for quick performance monitoring.
- Appropriate chart selection based on analytical requirements.
- Consistent typography and layout across all reports.
- Responsive design to improve readability and user experience.

Conclusion

The dashboard solution provides a comprehensive Business Intelligence platform for monitoring healthcare performance. Each report is designed to address specific business objectives while enabling stakeholders to explore patient satisfaction data through interactive visualizations, KPI monitoring, benchmarking, and trend analysis. Together, these dashboards support data-driven decision-making and continuous improvement in healthcare quality.
